

**ACTIVITY**

**The Energy Pie**

Can you guess what portion of total home energy use goes to power each of these activities in a typical North American home? Print this page and label each piece of the pie with the activity you think matches it. See the next page for the answers.

- Lighting
- Heating & Cooling
- Refrigerators/Freezers
- Water Heating
- Other Appliances
- Home Electronics

## ACTIVITY TIPS

## The Energy Pie

This activity appears in the section *Use Energy Efficiently*. The Energy Pie activity asks students to guess at how much of home energy use goes to power various activities in a typical home.

Encourage students to print the Energy Pie and label it with their guesses before they review the answer key.

- Lighting—12%
- Heating & Cooling—46%
- Refrigerators/Freezers—8%
- Water Heating—14%
- Other Appliances—16%
- Home Electronics—4%

Remind students that these figures are based on national averages. If your climate is extremely hot and/or cold, you will use more energy for heating and cooling than the numbers show. Likewise, if your climate is quite moderate, your heating and cooling energy use will be smaller than that shown on the pie chart.
